Special Fall Planting Guide

A Few Selected Items Specially Recommended For Fall Planting

Roses, Oriental Poppies, Hemerocallis, Phlox, Iris, Peonies, Shrubs, etc. For more complete listing of the above items and general selection of Hardy Plants, refer to our catalogue of last Spring.

Three Outstanding New Shrubs

Doronicum Hirsutum (Doh-rik'-ni-um)

A very hardy small shrub, belonging to the pea family. It is much branched, and rather trailing habit. Grows to 18 inches in height. In our opinion it is one of the finest low-growing shrubs for covering sunny dry banks. Attractive medium gray foliage and masses of pinkish white flowers in early summer. 50c ea.; 3 for \$1.25; \$4.50 per doz.; \$30.00 per 100.

Salix Purpurea Nana (Dwarf Blue Leaf Arctic Willow)

An excellent dwarf willow which is very suitable for edging, grows to 3 ft. in height, but can be kept much lower by shearing it. Grows well in any soil, and is very hardy. \$3.00 per doz. \$20.00 per 100.

Potentilla Fruticosa Purdomii

A truly lovely new small shrub, blooming continuously from May to September. Grows to 2 ft. making an ideal shrub for rock gardens or in front of taller growing shrubberies. It is an excellent bloomer with bright sulphur-yellow flowers. 75c ea.; 3 for \$2.00.

Two Lovely Alpine or Miniature Roses

Oakington Ruby. A very free bloomer with brilliant red flowers all summer. 8-12 in. high.
Rouletti. The true miniature form, lovely tiny pink roses all summer. Very popular.

Either above two Miniature Roses: 50c ea.; any 3 for \$1.25; any 6 for \$2.25; any 12 for \$4.00.

TOP-NOTCH ROSES for Your Garden

Here is the pick of the crop in new Rose varieties. Of course, we are anxious that you should have Roses of superior quality, form, color and fragrance, so we have carefully selected varieties offered on these pages. The Rose, Queen of Flowers, now more than ever gives us new inspiration and a desire for beauty at a time when confusion reigns everywhere. Our suggestion is **plant more Roses.**

Growing Roses need offer no problems if you prepare the soil well in advance of planting. Dig to a depth of 18 inches and incorporate well-decomposed stable manure with the soil or use some complete fertilizer. Prepare the bed and allow it to settle for several weeks before planting. You will find the plants which we send you unusually vigorous with well-developed roots. Dig a hole large enough to accommodate these roots without crowding. The plants should be set deep enough that the bud is just beneath the surface of the bed. Fill the hole with well-prepared soil and firm it thoroughly with your feet. Before the ground freezes in the fall, hill the soil up around each plant to a height of 8 inches. This bit of extra caution will help to carry your Roses over in good condition. Spring-planted Roses need the same treatment of hilling up the soil until new growth starts. This caution protects the plants from undue exposure to wind.

Just a word of advice—spray or dust regularly to keep your Roses in healthy condition. This extra effort will more than repay you with an abundance of bloom and sweet fragrance.
